SKILLS SUMMARY

- **Languages**: Python, Core Java, ASP.NET framework, JavaScript, OOPS concepts, Data structures.
- **Frameworks**: TensorFlow, Pytorch, Django, Devops pipelines, Spring boot, React, Angular.
- **Tools**: ReactJS, MongoDB, SQL, REST API, JSP, HTML/CSS.
- **Platforms**: Git, Postman, Microsoft Office, Visual Studio Code, Microsoft Server management studio.
- **Soft Skills**: Excellent communication, Time Management, Problem Solving, Agile methodology.

WORK EXPERIENCE

Associate Data Scientist

Quamin Tech Solutions LLP, Bangalore | Jul 2025 – Present

- Developed AI-based cybersecurity application with full-stack implementation, including frontend (HTML5, CSS3, React.js), backend APIs (RESTful, Node.js/Express), and AI/ML integration using Python/Django.
- Implemented Prompt Injection Detection, Hallucination Detection, Bias Detection & Fairness, and Compliance Monitoring using OOP principles and Agile methodology.
- Optimized SQL Server/PostgreSQL queries and Docker containers for scalable deployment and performance.

AI/ML Engineering Intern

Quamin Tech Solutions LLP, Bangalore | Apr 2025 – Jun 2025

- Built AgriCare 1.0 full-stack web app using React.js frontend (ES6+, responsive design), MySQL backend, and Python ML models with Flask APIs for predictive analytics.
- Integrated chatbot functionality via RESTful APIs and Entity Framework-like ORM for seamless data flow and cross-device compatibility.
- Collaborated in Agile sprints, applying problem-solving to enhance ML model deployment and Git version control.

Student Intern

Isana Systems, Pune | Mar 2023 – May 2023

- Engineered Zoom bot for real-time transcription and speech recognition, integrating JavaScript/Node.js APIs and backend logic with MySQL/PostgreSQL optimizations.
- Developed scalable backend services using OOP in Python/C#, handling database queries for improved performance.
- Supported full-stack enhancements with TypeScript and Agile practices for reliable API integrations.

EDUCATION

AISSMS Institute of Information Technology, Pune — Pune, India
Bachelor of Engineering: Electronics and Telecommunication — June 2025

Professional Certification in AI & Data Science — ONGOING
IIT Indore x Microsoft (Drishti CPS)

PROJECTS

TaskMaster – Full-Stack Task Management System

- Built ASP.NET Core MVC, C#, Entity Framework Core, SQL Server app for task CRUD, JWT authentication, role-based access (Admin/User), and SignalR real-time collaboration.
- Developed RESTful APIs with prompt injection validation, integrated React.js, TypeScript, ES6+, HTML5/CSS3 frontend and Python/Flask ML microservices for AI task prioritization.
- Applied OOP, Agile, Git; Docker containerized, Azure deployed (99.9% uptime, MySQL/PostgreSQL queries 40% faster).

CyberVote – Secure Real-Time Voting Platform

- Engineered Spring Boot 3.x, Java 17, Spring Security (JWT/OAuth2), Spring Data JPA, PostgreSQL backend with Swagger APIs, Prompt/Hallucination Detection middleware.
- Built Angular 18, TypeScript, ES6+, Bootstrap 5 frontend with WebSocket/STOMP live updates; integrated Python/FastAPI ML via OpenFeign (97% fraud detection accuracy).
- Used Maven, JUnit 5, Jasmine (92% coverage), Docker Compose, AWS/Heroku, GitHub Actions, OOP, Agile for 50% faster queries.

Agri-Assistant – Smart Farming Intelligence

- Developed Python, Flask, PostgreSQL platform with scikit-learn Random Forest (92% accuracy), Gemini AI, OpenWeather, OpenAI chatbot (Prompt Injection Detection), Google Maps.
- Created HTML5/CSS3, JavaScript, Bootstrap, Chart.js responsive dashboards with PDF reports using OOP, Agile, Git.
- Docker/Heroku deployed (45% faster PostgreSQL queries, pytest 95% coverage).
